

GASOLINE TANKS GREATER THAN 250 GALLONS NOT USED PRIMARILY FOR FUELING OF IMPLEMENTS OF HUSBANDRY

Applicable Requirements and Compliance Certification

**Farms located in the
Sacramento Metropolitan Air Quality Management District
(SMAQMD)**

This form may be used in lieu of standard form "Part D – Compliance Certification." If you choose to use this form, it must be accompanied by the Applicable Requirements and Compliance Certification form for General Farming Operations in the SMAQMD and other equipment and operation forms as applicable. Refer to the attached SMAQMD Part D instructions for more information.

Business Name of Applicant: _____

1. Equipment Description - Describe gasoline tanks.

Tank No.	Tank Designation	Capacity in gallons	Aboveground or Underground
<i>Example</i>	<i>South Tank One</i>	<i>380</i>	<i>Aboveground</i>
1			
2			
3			
4			
5			

<p>2. Applicable Requirement(s) Applicable SMAQMD Rule and Section number that the gasoline tanks must comply with.</p>	<p>3. Method used for determining compliance. This is the primary method used to determine the tank is in compliance with the applicable requirement.</p>	<p>4. Compliance Status for all tanks listed above (Use a separate form for tanks with varying compliance status)</p>
<p>RULE 448 GASOLINE TRANSFER INTO STATIONARY STORAGE CONTAINERS</p> <p>Each storage tank shall be equipped with an CARB certified Phase I vapor recovery system, which is maintained and operated according to manufacturers specifications.</p>	<p>1. I have knowledge that this system has been installed <u>and</u></p> <p>2. I maintain the system according to manufacturers specifications.</p>	<p><input type="checkbox"/> in compliance with SMAQMD Rule 448 at this time and I will continue to comply with all requirements.</p> <p><input type="checkbox"/> not in compliance SMAQMD Rule 448 at this time, but I will be by: _____/_____/_____ (submit plan per instructions).</p>

2. Applicable Requirement(s) Applicable SMAQMD Rule and Section number that the gasoline tanks must comply with.	3. Method used for determining compliance. This is the primary method used to determine the tank is in compliance with the applicable requirement.	4. Compliance Status for all tanks listed above (Use a separate form for tanks with varying compliance status)
<p>RULE 448 GASOLINE TRANSFER INTO STATIONARY STORAGE CONTAINERS</p> <p>Each aboveground storage tank shall be equipped with a certified pressure-vacuum relief valve set to eight ounces per square inch unless otherwise specified in the applicable CARB executive order and providing that such setting will not exceed the vessel's maximum pressure rating.</p> <p>Each underground storage tank shall be equipped with a certified pressure-vacuum relief valve set to 3.0 +/- 0.5 inches water column pressure relief and 8.0 +/- 2.0 inches water column vacuum relief unless otherwise specified in the applicable CARB executive order.</p>	<p>1. I have knowledge that the tank is (tanks are) equipped with certified pressure-vacuum valves <u>and</u></p> <p>2. The equipment is maintained as required.</p>	<p><input type="checkbox"/> in compliance with SMAQMD Rule 448 at this time and I will continue to comply with all requirements.</p> <p><input type="checkbox"/> not in compliance with SMAQMD Rule 448 at this time, but I will be by: ____/____/____ (submit plan per instructions).</p>
<p>RULE 449 TRANSFER OF GASOLINE INTO VEHICLE FUEL TANKS</p> <p>A person shall not transfer, or permit the transfer of, gasoline from a stationary storage container or delivery vessel with a capacity of 250 gallons or more into any motor vehicle fuel tank with a capacity of 5 gallons or more unless the displaced gasoline vapors or gases are processed by a vapor recovery system that shall prevent emission to the atmosphere of at least 95%, by weight of the hydrocarbon vapors displaced from the motor vehicle fuel tank during the transfer of gasoline into the fuel tank.</p> <p>Maintenance inspections, except as provided in Section 113, shall be conducted for each day the vapor recovery system is operated to ensure that vapor recovery system components that are verifiable through direct measurement or observation are in proper working order.</p>	<p>1. I have knowledge that the tank is (tanks are) equipped with certified Phase II vapor recovery equipment <u>and</u></p> <p>2. The equipment is maintained as required <u>and</u></p> <p>3. Maintenance inspections are conducted as required.</p>	<p><input type="checkbox"/> in compliance with SMAQMD Rule 449 at this time and I will continue to comply with all requirements.</p> <p><input type="checkbox"/> not in compliance with SMAQMD Rule 449 at this time, but I will be by: ____/____/____ (submit plan per instructions)</p>
